50	USA	<p><b>TrainSafe</b> TrainSafe is a behavioral-based training program for laboratory personnel and biosafety professionals. The course is designed to prepare staff for safely working in BSL-2, BSL-3, and other high-containment environments. Our four-day class provides a hands-on approach and is taught by experienced professionals with course material derived from the BMBL, focusing on Applied Biosafety.</p>	<p>E-mail: <a href="mailto:sean@seankaufman.com">sean@seankaufman.com</a></p> <p><a href="#">Website</a></p>
51	USA	<p>The Biosecurity Research Institute is a key facility that helps make Kansas State University a center of global expertise for biodefense. This unique biocontainment research and training facility is designed and constructed for Biosafety Level-3, or BSL-3, and Biosafety Level-3 Agriculture, or BSL-3Ag, work. The BRI provides K-State scientists and their collaborators with a safe and secure location to study the high-consequence pathogens that pose threats to agriculture, the food supply and human health.</p> <p>With interdisciplinary biosecurity research programs, agrosecurity initiatives and the development of collaborative research with the U.S. Department of Agriculture and the Department of Homeland Security, the BRI is training staff and conducting research on high-priority pathogens destined to be studied at the National Bio and Agro-defense Facility, or NBAF, that is currently under construction adjacent to the BRI.</p>	<p>Biosecurity Research Institute 1041 Pat Roberts Hall Kansas State University Manhattan KS 66506 USA</p> <p>Ph: +1 785 532 1333</p> <p><a href="#">Website</a></p>
